# SCHOOL PREPAREDNESS STUDENT SAFETY ACTION PLAN

COVID19 is a global pandemic, these are extraordinary times in the history of mankind and our lives, and they demand extraordinary measures and thus prudent academic decisions.

In the light of the prevalent scenario, The Millennium Education realizes the need to take precautionary measures to ensure the educational ecosystem created by The Millennium Education is resumed to ensure our learners aren't deprived of their education.

In order to support all the stakeholders being negatively affected during the pandemic, TME has promptly devised Post Covid-19 Student Safety Preparedness Action Plan for Visible Teaching and Learning that shall enable seamless provision of education to learners. Our action plan entails focuses on the following:

## School Preparedness Student Safety Action Plan for Visible Teaching and Learning

### a) Caution at Entrance into School:

Learners' safety and security is our utmost priority and major concern as a responsible academic organisation. Starting from the time when the learners would enter the school gate till, they safely head home, precaution and safety will be ensured at each step.

### b) Sanitizing Tunnels:

As soon as our learners arrive at the school gate they will pass through sanitizing tunnels which would shower spray and thus sanitize clothing, shoes, school bags, water bottles or any other belongings they are entering or leaving school with.

### c) Thermal Guns:

The school staff will be provided with the thermal guns in order to take each child's temperature before entry to the school. If any child's body is not depicting the regular/normal human body temperature that child will not be allowed entry to school and will be asked to rest at home till he/she recovers from the fever.

### d) Protective Face Shield:

TME learners will be provided with a Protective Face Shield by the school administration. Please ensure as parents/guardian that your child wears this shield daily to school and takes care of it as this should now be considered as part of regular school uniform. The child must wear it all day long till the school day ends and safely take it to home to be worn the next day at school.

### e) Face Mask:

Each learner would also be provided with the face mask by the school administration. We would appreciate all our learners resuming classes to wear masks as part of their regular uniform and wear it on daily basis. The learners will be trained to regularly pull down their masks and breathe fresh air each time they are out in open air (for example during break, physical education, out in corridors moving to ICT/Science Lab, pack up time etc.) while keep it on while sitting inside the classrooms.

### f) Polythene Gloves:

TME schools will also be providing all their learners with polythene gloves to ensure safety. All learners shall be wearing gloves to school regularly too and are expected to keep them on while writing and doing other tasks till the school day ends except for their hand washing and hand sanitizing drills.

### g) Hand Sanitizers:

TME will also be providing hand sanitizers to all its learners on the first day. Learners are required to carry their own mini-hand sanitizers to school daily. There will be a routine practice and training of learners by teachers to sanitize their hands after every class. Each learner should also carry mini-tissue packs, a fresh hand towel each day with them for the hand washing drills to be followed during the day.

### h) No Morning Assemblies or Large School Gatherings:

Any kind of group interaction or gathering would be avoided during school hours till December 2020 which also includes having no morning assemblies. No functions will be held at school, no after school engagement and no events will be organised till the threat of corona virus spread is completely ruled out.

### i) Classes with Half Class Strength:

Learners shall follow a full study schedule, yet the strength would be minimized to half and alternate days of attendance for a start will be followed. For example, your child will take a blend of visible and virtual classes, three days of classes at school and two days of virtual classes.\*

### j) Class Seating Plans:

Learners' safety is our first and foremost priority and for this reason new seating plans supporting the rule of social distancing shall be maintained across all campuses nationwide. Different seating arrangements will be suggested to teachers as per their class strength and the campus administration as well as monitoring and evaluation team will strictly monitor if seating protocols have been followed to ensure safety.\*

### k) Hand Washing Drill:

Learners will be given a break of 3-5 minutes after every two lessons during the day to wash hands completely with soap and water and to wash them correctly. This means that each learner will wash hands thrice during school hours as part of the regular drill. The duty teacher will give a visual demonstration of washing hands correctly and for 20-30 seconds duration.

**Step 1:** Wet hands with running water, cold or warm water is equally good.

**Step 2:** Apply enough soap to cover wet hands, make a lot of foam using both hands.

**Step 3:** Scrub all surfaces of the hands including back of hands, between fingers and under nails. This should be for done for at least 20-30 seconds.

**Step 4:** Dry hands with a clean cloth or single-use towel

### l) Physical Exercises to Promote Protection Against Disease:

Physical education lessons will be well planned to engage children in tough physical routine and physical sport they find interesting. These games lessons will be arranged indoor or outdoor depending on the weather conditions, yet it is very essential for all learners to participate in these activities.\*

### m) Student Safety Message Stickers

Covid Safety Messages Stickers and rules shall be displayed in visible places in the schools to remind students about the safety precautions to be taken at all times. Safety messages will be displayed in corridors, classrooms or any space which has student traffic.

### n) Counselling Sessions:

Children's relationship towards their teachers and peers is likely to improve and thus strengthen relationships upon resuming visible classes after Covid-19 Crises. Sudden discontinuity of classes and a sudden stop to all social life affected young minds equally and they too did feel the stress of this unknown Corona virus pandemic either directly or indirectly. Children are likely to be excited to see people they have missed during work-from-home period. It will be the responsibility of all teachers and the school administration to counsel children and comfort them to help them cope better with the stressful situation they have been through.

\* The student safety action plan for visible teaching & learning is subject to TME terms and conditions
